

	FALL 2013															SPRING 2014																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																									

	FALL 2013																SPRING 2014															
	IT																															
Year 1	Innovation Workshop		Ideas to Impact					Systems Optimization					January	Fast Methods for PDEs					Advanced Algorithms, Multicore Algorithms													
			Machine Learning					Great Computational Methods						Computational Control					SkolTech Research													
Year 2	TBD		Great Computational Applications					Restricted Sector Elective					January	Industry Project					Elective / Reseach													
			Restricted Sector Elective					Research Project						Thesis					Thesis													

	FALL 2014															SPRING 2015														
				Sept					Late Oct																					
	BIO - Track 1																													
Year 1	IW (E&I 1)		Ideas to Impact (E&I 2)			Integrative Multiscale Physiology II			January	Protein Sequence, Structure, and Function (PyRosetta) 20.320/20.490			Mechanisms of Drug Action / Drug Design																	
			Integrative Multiscale Physiology I			Integrative Multiscale Physiology III				Biomolecular Kinetics and Cell Dynamics (ODE MODELING) 20.320/20.420			Systems Analysis of Biological Networks 20.440																	
Year 2	TBD		Regulatory ... (Sector Course)			Research (Internship)			January	Research			Research																	
			E&I course #3			Research (Internship)				Research			Research																	

	FALL 2014												SPRING 2015											
	Sept						Late Oct																	
	BIO - Track 2																							
Year 1	IW (E&I 1)	Ideas to Impact (E&I 2)			Integrative Multiscale Physiology II			January	Devices, Data, Information - Medical Systems			Device Design - External Devices												
		Integrative Multiscale Physiology I			Integrative Multiscale Physiology III				Device Design - Internal Devices			Regulatory (Sector Course)												
Year 2	TBD	GMP / Manufacturing			Company Project			January	Research			Elective / Research												
		E&I course #3			Company Project				Research			Elective / Research
